

# InnoAg Stimgo

Fertilizer

Make Your Plants GO Stress Free!

## Introducing InnoAg Stimgo

**InnoAg Stimgo** is an innovative fertilizer based on 100% organic plant-derived protein hydrolysate nitrogen. This nitrogen is rapidly absorbed by leaves and translocated in plant tissue. **InnoAg Stimgo** improves plant growth and supports the most important phases of plant growth, flowering, and fruit enlargement. This product may be used in combination with fertilizer programs to help achieve high productivity and quality.

**InnoAg Stimgo** contains 31% vegetal origin peptides. The peptides in InnoAg Stimgo affect the growth and development of plants and regulate various protection responses. One of the peptides already identified in this product has shown to be active in all tested crops and it improves cell multiplication and lateral rooting. It also aids germination and plant development.

| COMPOSITION      | % (W/V) |
|------------------|---------|
| Organic Nitrogen | 5.0     |
| Organic Carbon   | 19.0    |
| Vegetal Peptides | 31.0    |

## Why InnoAg Stimgo?

**InnoAg Stimgo** is suitable for use on all growing plants and it may be used in combination with fertilizer programs to help achieve high productivity and quality. Apply it foliarly at rates ranging from 16-32 fl. oz./acre during the growth cycle of the plant. Applications may be repeated up to 6 times per growing season.

# Key Benefits

**InnoAg Stimgo** has shown excellent results for many crops such as soybeans, corn, sugarcane, sugarbeets, grapes, onions, tomatoes, lettuce, and ornamentals. On tomatoes, as shown by the graphs below, **InnoAg Stimgo** significantly improved the average fruit weight per cluster and the overall yield when applied at 32 fl. oz./acre every 15 days.
